This year marks the 22nd year of the MASB Education Excellence Awards, a program created to recognize and encourage innovation and student achievement in Michigan public schools. Awards are given to programs throughout Michigan public schools who showcase positive and meaningful student participation in their schools and community. The awards had a record setting year with 260 applications received from school districts across the state. Ten impactful programs were selected as winners and received $2,500 to grow their programs. In the pages that follow, we highlight each of the winning programs.

The ten winning programs are incredibly unique, ranging from a special needs garden to elementary STEM programs. We appreciate their hard work, creativity, and dedication to Michigan students. The SET SEG Education Foundation is proud to sponsor the Education Excellence Awards, and we are excited to share with you the stories of this year’s winners.

CONGRATULATIONS
TO THE 2016 AWARD WINNERS
